Some artillery regiments are supplied with Soviet mortars of 120 mm caliber, instead of the Skoda howitzers.

The mortars are of two types: the Rumanian type, manufactured in the Resita factories, with calibers of 81.4 mm and 120 mm; and the Soviet type mortar with the same calibers and no great differences in construction.

4. The machine guns are of two types: Maxim, Soviet type, with gun carriage (difficult to transport); and the Z.B. (Zbrojovska Brno), caliber 7.92 mm, made in the Cugir factories. Each drum contains 150 rounds of ammunition. This machine gun is easy to maneuver and practical.
5. The automatic rifle used in a Rumanian infantry division is the Z.B. Soviet automatic rifle, 7.92 mm caliber, each clip consists of 20 rounds, made in the Cugir factories.
6. The automatic pistols used in a Rumanian infantry division are the Orita, made in the Cugir factories, 9 mm caliber, each clip consists of 30 rounds of ammunition; the Beretta automatic pistol [redacted], caliber 9 mm, with 30 rounds of ammunition; and the Soviet automatic pistol with the cartridges in a revolving cylinder, containing 72 cartridges.
7. The rifles used in a Rumanian infantry division are the Z.B. rifle 7.92 mm, with 10 rounds of ammunition.
8. The grenades used in a Rumanian infantry division are as follows: the Rumanian defensive grenade with handle, shaped like a lemon, with a cover of segmented cast iron. Its radius of effectiveness is ten meters; the offensive grenade of Rumanian type, with handle, shaped as the one above, with a smaller radius of effectiveness; and the German type of offensive grenades, with handle.
